Examination	University	Institute	Year	CPI/%
B.Tech (ET)	HBTU Kanpur	HBTU Kanpur	2024 – Present	7.0/10.0
Diploma (IT)	BTEUP	Government Polytechnic, Lucknow	2024	77.78%
Class XII	UP Board	Sri Sai Inter College	2021	86.80%

EXPERIENCE

Dualite AI

Backend Intern

August 2025 – Present

- Scaled backend systems with cross-functional teams, contributing to product growth to **100K+ users**
- Tested and validated **end-to-end payment pipelines**, ensuring reliable transaction processing
- Delivered **5+ production-ready full-stack applications** with robust backend logic, APIs, and deployments
- Contributed to **Prompt Enhancer and Visual Editor**, improving manual user interaction efforts by **30%**
- Performed backend testing and debugging, improving **system stability and production readiness**

STC - Indian Railways, Lucknow

AI Research Intern

June 2025 – July 2025

- Built and deployed a **face recognition system** using computer vision integrated with a humanoid robot
- Improved model accuracy from **60–70% to 94%** via dataset enhancement and model optimization
- Enabled **real-time inference (sub-second latency)** through collaboration with robotics team

SoftPro India, Lucknow

SDE Intern

July 2023 – September 2023

- Contributed to an **e-learning platform** serving **30,000+ users**
- Optimized backend and database queries, reducing response time by **15%**
- Delivered **scalable, production-ready features** with cross-functional teams

SKILLS

- **Languages:** C, C++, Python, Javascript, SQL
- **Framework and Libraries :** Django, Tkinter, Bootstrap, Tailwind CSS, MaterialUI, React.js, Node.js, Hono.js, OpenCV
- **Databases :** MySQL, PostgreSQL, SQLite3, MongoDB, Supabase, NeonDB, TimeScaleDB
- **Dev Tools and Utilities :** Git, GitHub, Notion, Figma, Postman, Docker, Jira.

RELEVANT CERTIFICATIONS & POSITIONS

- **Lead**, Google Developers Group On Campus (GDGoC), HBTU Kanpur Chapter.
- **Technical Head**, Association of Electronics Engineers (AETE), HBTU Kanpur.
- **Technical Team**, NSS HBTU Kanpur.
- Completed **100 Hours Course on Cyber Security and Digital Forensics**, IIIT Kota.
- Completed **Course on Computer Concepts**, National Institute of Electronics and Information Technology (NIELIT).

MISCELLANEOUS ACHIEVEMENTS

- **5x Hackathon Winner**, Won Square Hacks Finals (IIT Delhi) among **600+ teams nationwide** with Rs. 40,000 cash prize
- Won **Best AI Innovative Use Case** at GenAI Hackathon Finals among **85+ teams** (AI Community Lucknow & TFUG)
- **Runner-up**, TechX Hackathon (Rs. 10,000) for building a cybersecurity solution for **Cyber Police Lucknow**
- **Smart India Hackathon (SIH) Internal Qualifier** among **100+ teams** across institute-level selection
- Organized hackathons and tech events under **GDG HBTU & AETE**, engaging **500+ students** from multiple colleges
- Mentored students in **Web Development, AI/ML, and emerging technologies** across technical communities

PROJECTS

ASHA AI – Voice-First Rural Health Companion [Link]

FastAPI, React, Supabase Auth, NeonDB, Google Cloud, AI Agents, Whisper, Mistral & Vertex AI API

- Developed a **multilingual voice-first AI assistant** enabling rural users to access healthcare via WhatsApp and mobile apps
- Built a **speech-to-intent pipeline** using Whisper and fine-tuned LLMs to interpret regional dialect inputs
- Designed a **medical knowledge system** using WHO + govt guidelines for safe AI responses
- Implemented **voice-based tracking, nutrition planning, and risk detection** for maternal and adolescent health
- Engineered **ASHA worker module** for automated logging, summaries, and high-risk case detection

Pulse AI – Clinical Surveillance System [Link]

FastAPI, React, Supabase Auth, NeonDB, TimescaleDB, Google Cloud, AI Agents, Vertex AI

- Built an **event-driven health monitoring system** for early risk detection using time-series analysis
- Developed **data ingestion pipelines** using Google OAuth + Drive API (ZIP → SQLite → structured data)
- Designed **CareScore (0–100)** engine to track patient health trends across multiple signals
- Implemented **multi-role system** (Patient, Doctor, Caretaker) with RBAC and **real-time dashboards** for updates & alerts

AI Job Hunting Automation Agent [Link]

Agentic AI + Automation

- Built an **AI-driven job pipeline** scraping platforms and ranking jobs based on resume fit
- Automated workflows using **n8n**, running every 6 hours with real-time updates
- Delivered structured outputs to Google Sheets with **email alerts**, saving 10+ hrs/week

Discom – Mentor Connect Platform [Link]

Full-Stack + Real-Time Systems

- Built a **real-time collaboration platform** with chat, video calls, and WebSockets and supports **100+ concurrent users**
- Implemented **role-based access, AI assistant, and scalable backend architecture**

AI-Powered Targeted Commenting Agent [Link]

Agentic AI + Backend

- Built a **human-in-the-loop agentic system** for targeted social media engagement across platforms
- Designed a **state-machine workflow** with safe transitions and auditability (no unintended posting)
- Implemented **LLM + platform adapters** with a context-aware prompt pipeline for consistent outputs
- Developed **feedback loop + compliance layer** to improve generations and ensure brand safety
